RADIANCE™

Fabricated Acrylic Letters

Gemini is known for manufacturing the finest dimensional letters. Fabricated acrylic letters are our latest contribution to serving your growth in an evolving industry. This new LED lit product further expands our formed GemLite letter look by allowing not only illumination of the face, but also the full returns. Fabricated Acrylic Letters and Logos feature crisp sharp edges, depths from 1-1/2" to 4", and sizes from 12" - 36" high to help communicate yet a higher degree of lighting sophistication.

Fabricated from light diffused cast acrylic, these letters are designed to evenly diffuse the LED light throughout the face and returns. Faces are constructed with 3/16" (4.5mm) thick translucent acrylic, available in seven colors. Letter returns are made with 1/8" (3mm) thick acrylic. Components are precision routed to your specifications, fabricated with hand buffed edges, populated with LEDs, then UL approved.

Handcrafted in North America, available in days

- ▶ Sharp, defined edges deliver a refined style
- ▶ UL-listed LED illumination of face and returns diffuse light consistently
- ▶ Ideal for medium- to large-sized illuminated custom logos and letters
- ▶ Shallow depth letters can be used as stand alone or incorporated into a light box
- ▶ Precisely cut from translucent acrylic

Features

- Precision routed logos and letters for indoor or outdoor applications
- Available in as few as 10 days
- Character size ranges from 12" to 36" tall
- Return depth of 1 1/2" to 4"
- Removable clear or light diffused Lexan back panel allows easy access

Available in 7 light diffused translucent colors
